Washing and Care Instructions For Your New BubuBibi New Diaper

Please follow all these instructions for best results

Before Use

Pre-wash the diapers. Select cold rinse and spin. For best results, pre-wash Bamboo diapers 7-8 times. Please do not use Hot water, please use only cold water.

After First Time Use

1. Hand wash or machine wash. If it is machine wash, please do not overload your washer. Do not use Hot water, please use cold water for washing.
2. Optional – Add ½ cup of baking soda to cut down odors. ½ Cup of vinegar to soften, whitens, sanitize, remove soap residue and deodorize.
3. Best to hang diapers outside but not directly under sun. If dryer is a used (not preferred), dry diaper under lowest heat. Prefer to drip dry outside. Fasten the buttons during wash.
4. For semi – solid to solid diapers, remove solids into the toilet or trash. After that, wash the diaper. Best to wash diaper as soon as possible, if not, please put diaper in diaper pail
5. Used cloth diapers – Recommended to wash immediately. If not, use a dry pail. Add baking soda if desired to help control odor. Do not soak diapers in water solution; it will wear out the diapers faster.
6. Do not use fabric softener. It will reduce the diapers absorbency. Please use vinegar; it is better and using fabric softener.
7. NEVER use bleach or detergent that contains chlorine bleach. It will shorten the diaper life.
